 assess candidates

Overview

This report provides you with the results of this candidate's PassCode™ game assessment.

When considering how well the candidate has done, employers tend to look at percentiles. Percentiles tell you how well the candidate has done in comparison to other similar individuals who have taken the test previously. For example, a graduate will be compared against a group of graduates.

The percentile will help you determine whether or not to take this candidate to the next stage of the process, based on whether they have satisfied the pass mark you have set (recommended 30-50th percentile).

This candidate scored at the 99th percentile which means their cognitive ability in attention is better than 99% of the comparison group.
